Subject: Call for submissions (Free of charge deadline: November 30, 2012)

I am writing on behalf of an international publishing house, Science and Education Publishing, USA (<http://www.sciepub.com>).

Science and Education Publishing (SciEP) is a multidisciplinary open access publisher of Journals covering the fields of Science, Technology and Medicine. All SciEP publications are subject to high-quality peer review, editorial and production processes and are freely available online.

Starting from October 2012 Science and Education Publishing (SciEP) is launching new series of Journals in different aspects of science, technology and medicine, aiming to publish and release first issues of these journals on February 2013, and therefore seeking volunteered editorial members from around the world to steer the new journals and to establish strong international collaboration. Interested researchers may apply on the website:
<http://www.sciepub.com/portal/EditorialBoardMember>

We are pleased to announce that submissions are now being accepted for peer review for all the journals across all our subject areas in SciEP. If you submit your paper before December 31, 2012, we will publish your work online free of charge. Please submit your manuscript via our online submission system: <http://www.sciepub.com/author>.

I am looking forward to hearing from you.

Kind regards,

David Rain
